CONSULATE GENERAL OF THE REPUBLIC OF INDONESIA, MUMBAI, INDIA
VOLUME 12 / DECEMBER 2009 MONTHLY

EXHIBITION CALENDAR 2010

ORGANIZED BY PT. Kristamedia Pratama

Email: info@kristamedia.com website: www.kristamedia.com

INDO LEATHER & FOOTWEAR : The 5th Int'l Exhibition on Leather & Footwear Machinery, Manufacturing Technology, Materials and Services www.indoleather-footwear.com **13 - 16 May 2010 Jakarta Convention Center**

INDOGARTEX : The 2nd Int'l Exhibition on Garment & Textiles Machinery, Manufacturing Technology, Materials and Services www.indogartex.com **13 - 16 May 2010 Jakarta Convention Center**

INDONESIA INTERNATIONAL MEDICAL & HOSPITAL EQUIPMENTS EXPO : Incorporating : Hospital Equipments and Supplies, Electromedical Equipments and Supplies, Laboratory, Physiotherapy - Homecare, Sports Medicine and Hospital IT www.indomeditaexpo.com **13 - 16 May 2010 Jakarta Convention Center**

INDOBEAUTY & INDOHEALTH EXPO 2009 : The International Exhibition and Conference on Beauty, Healthcare, Cosmetics, Spa Featuring: Cosmetic, Medical & Professional Cosmetics, Nutrition, Natural, Organic, Life Style, Plastic Surgery, Laser Surgery, Equipment & Instruments for Plastic and Laser Surgery, Disposable Products for Plastic Surgery, Devices For Figure Correction, and etc www.indobeautyexpo.com **13 - 16 May 2010 Jakarta Convention Center**

INDO DENTAL : Featuring : DENTAL, Dental Equipment & Instruments, Dental Materials & medicaments, Dental State-of-the-art, Dental Furniture, equipment for Infection Control, X-ray Equipment & Materials, Plastic Surgery, Implantation Products, Oral Hygiene, Physical Fitness Equipment, Technologies **13 - 16 May 2010 Jakarta Convention Center**

EAST PACK : The Int'l Exhibition on Processing & Packaging, Filling, Machinery, Equipment, Materials and Services www.eastindonesiaexpo.com **10 - 13 June 2010 Grand City - Surabaya**

EAST PLAS : The Int'l Exhibition on Plastic Machinery and Materials, Manufacturing Technology, and Services » www.eastindonesiaexpo.com **10 - 13 June 2010 Grand City - Surabaya**

SURABAYA PRINTING EXPO : The 4th Int'l Exhibition on all Printing Industries Machinery, Materials and supplies www.surabayaprintingexpo.com **10 - 13 June 2010 Grand City - Surabaya**

DIGITAL MEDIA & SIGN EXPO : The 4th Int'l Exhibition on all Printing Industries Machinery, Materials and supplies www.surabayaprintingexpo.com **10 - 13 June 2010 Grand City - Surabaya**

FOOD INGREDIENTS INDONESIA : The 8th International exhibition on Food Additives, Food Chemicals, Food Ingredients, Food Materials, Herb, Spices, Biotechnology for Agriculture and F&B www.interfood-indonesia.com **27 - 30 October 2010 Jakarta Int'l Expo**

FOOD AND HOSPITALITY INDONESIA : The 6th International exhibition on Hotel, Catering, Restaurant, Cafe Equipments, Supplies, Storage, Services & Related Technology www.interfood-indonesia.com **27 - 30 October 2010 Jakarta Int'l Expo, Hall A, B, C, D & open Space, Kemayoran**

BAKERY INDONESIA : The 6th International exhibition on Bakery, Confectionery Machinery, Equipments, Supplies, Ingredients www.bakeryindonesia.com **27 - 30 October 2010 Jakarta Int'l Expo**

HERBAL & HEALTH FOOD INDONESIA : The 7th International Exhibition on Herbal & Health Food, Food Supplement & Pharmaceutical Exhibition » www.interfood-indonesia.com **27 - 30 October 2010 Jakarta Int'l Expo**

AGRI INDO : The 2nd Int'l Trade Exhibition on Agriculture which covers major elements of agribusiness. » www.agri-indo.com **27 - 30 October 2010 Jakarta Int'l Expo**

ALL PRINT & PAPER INDONESIA : The 12th International exhibition on Printing (pre-press, press, post-press) Machinery, Equipment and Supplies www.allprintpaperindonesia.com **27 - 30 October 2010 Jakarta Int'l Expo**

DIGITAL & MEDIA SIGN EXPO : The International exhibition on Digital Printing, Media and Signage Expo » www.allprintpaperindonesia.com **27 - 30 October 2010 Jakarta Int'l Expo**

ALLPACK 2010 & FOOD PROCESSING PACKAGING INDONESIA : The 10th International exhibition on Food & Pharma, Processing & Packaging, Filling, Machinery, Equipment, Materials and Services » www.foodprocessing-packaging.com **27 - 30 October 2010 Jakarta Int'l Expo, Hall A, B, C, D & open Space, Kemayoran**

INDONESIA INTERNATIONAL PHARMA EXPO : The 5th International Exhibition on Pharmaceutical, Raw Materials, Active Ingredients, Processing Machinery, Packaging Machinery, Equipments » www.interpharma-indonesia.com **27 - 30 October 2010 Jakarta Int'l Expo,**

ALLPLAS INDONESIA : The International Exhibition on Plastic Machinery and Materials. » www.interplasticindonesia.com **27 - 30 October 2010 Jakarta Int'l Expo**

ECONOMIC GROWTH TO BOOST INVESTMENT IN 2010 : Indonesian Finance Minister Sri Mulyani Indrawati has stated that the economic growth projection of 5-5.5 percent in 2020 would boost investment in

the country. Investment is closely related to economic prospects. The minister said that economic growth next year could even reach 6 percent based on an optimistic prediction. The economic growth projection of 5-6 percent created optimism that would boost investment. In other aspects, the government would continue to take various steps to remove difficulties and investment barriers.

RI EYES 46% GROWTH IN OIL AND GAS INFRASTRUCTURE

: The Indonesian government announced its long-term oil and gas management road map, revealing its ambitious target to attract US \$31.2 billion in investment for oil and gas infrastructure between 2010 and 2014. Of the figure, 69.49 percent or US \$21.68 billion is targeted for investment in gas facilities, including liquefied natural gas (LNG) and liquefied petroleum gas, LPG refineries, receiving terminals and residential pipeline networks. The remaining 30.51 percent or US \$9.52 billion is for oil facilities, including refineries and rigs. In 2010, the government is targeting US \$2.94 billion of oil and gas infrastructure investment while in 2011 it is expected to increase this by 7.99 percent to US \$3.18 billion. The investment target is projected to grow at an average annual rate of 46 percent from 2010 to 2014. The development of new gas rigs will continue until 2014 with an average annual investment target of US \$3.22 billion per year. Next year, the ministry will kick off the development of two new gas rigs, namely in Lapangan Rambutan in South Sumatra and in Pondok Tengah in West Java with a total investment of US \$2.42 billion. The two new rigs are expected to produce up to 1,020 million standard cubic feet per day (MMSCFD). In 2011, the government is planning to build at least 16 new gas rigs by 2014 which can produce up to 20,261 MMSCFD. To process the gas from the new rigs, the government is also planning to construct gas refineries, both LNG and LPG, with a total investment of US \$3.65 billion during the 2010-2014 period. New oil rigs and refineries are expected to be constructed between 2010 and 2014, with an estimated total investment of US \$3 billion and US \$6.52 billion respectively.

INDONESIAN EYES INVESTMENT IN MINING AND GEOTHERMAL ENERGY

: The Indonesia country expects up to US \$3.57 billion in investment in mining and geothermal energy next year, which would represent an increase by more than 90 percent of realized investment this year. For this year, the Indonesian government predicted investment in the sector would reach US \$2.33 billion, but only about 80 percent of that target has been achieved so far, according to Witoro Soelarno, the secretary to the directorate general of minerals, coal and geothermal energy at the Energy and Mineral Resources Ministry. Next year will be another important year for the country's mining industry as four long awaited implementation regulations to the new mining law are expected to be issued in January. The implementation regulations, covering mining areas, coal and mineral businesses, mining supervision, reclamation and postmining issues, are expected to provide legal certainty and boost investors confidence in developing the country's mining and geothermal reserves. However, Witoro added that major investment next year would still come from existing concessions rather than new mining licenses issued under the recent law. Most of the investment in 2010 will come from existing mining contracts. Investment from new mining licenses will not dominate.

BKPM TO ANNOUNCE NEGATIVE INVESTMENT LIST : The Head of the Capital Investment Coordinating Board (BKPM) Gita Wirjawan stated that BKPM would announce the negative

investment list early in 2010. Gita Wirjawan added that the change in the negative investment list would be to remove uncertainties and to prevent all matters that could be multi-interpretation. In connection with the investment climate in Indonesia, Gita said that BKPM would do its best to increase foreign investment by 15 percent in 2010. BKPM said that 50 percent of foreign investment in Indonesia at present came from Southeast Asian nations. In the meantime, the BKPM also set itself a target of increasing domestic investment by 15 percent in 2010.

60 PERCENT OF INDUSTRIAL ZONES PRODUCTS EXPORTED

: At least 60 percent of goods produced in industrial zones are exported overseas every year. Chairman of Industrial Zone Association, Hendra Lesmana recently stated on the sidelines of the HKI National Meeting. According to Hendra, there are 88 industrial zones in Indonesia, of which 12 zones belong to state-owned companies and 76 zones controlled by the private companies. The biggest spread is still in Java Island with 58 zones, Sumatera and Batam (26), Kalimantan (1) and Sulawesi (3).

FOUR SEAPORTS TO OPERATE 24 HOURS A DAY

: Four seaports in Indonesia will operate 24 hours a day as of February 2010. The four seaports are Belawan in Medan, North Sumatra, Tanjung Priok in Jakarta, Tanjung Perak in

Surabaya, East Java and Soekarno Hatta in Makassar, South Sulawesi. The 24 hour service includes ship escorting service and readiness of the port administration to serve docking ships at any time. A 24 hour service program will also be carried out in several first class ports in the country besides the four seaports but the program would be implemented in stages because the priority was still the four seaports.

BANDA TO HAVE SEAPORT FOR BIG SHIPS

: Banda Aceh is being prepared to have a seaport for very large ships by 2014. Banda Aceh was strategically located to serve as point of transit for very large ships and could thus also become a gateway to western Indonesia, a position now held by Medan in North Sumatra. Aceh Governor, Irwandi Yusuf said that the existence of such a seaport was expected to boost Aceh provinces economic activities through its multiplier effect. The Aceh provincial government now already had a master-plan related to the envisaged hard port which included the construction of various supporting facilities. Among those facilities would be an oil refinery and an oil storage complex on Sabang Island to supply fuel to feeder ships from China and Singapore. Irwandi said that the port plans had been devised also in anticipation of the free trade era beginning in 2012. The hard port may not yet be fully ready by 2012 but is must be by 2014.

RI TO PROVIDE INCENTIVES TO BOOST DEVELOPMENT OF PALM OIL INDUSTRY

: Coordinating Minister for Economy Hatta Radjasa stated that the government would provide incentives to boost the development of palm oil industry into the downstream level, to provide more employment. Hatta Rajasa said that Indonesia's palm oil industry has been growing steadily in the upstream sector, making Indonesia the world's number one palm oil producer. Hatta identified three locations that would serve as industrial estates for the development of palm oil downstream industry. They are Kuala Enok in Indragiri Hilir regency in Riau, Maloi in Kutai Timur regency in East Kalimantan and Sei Mangke in Simalungun regency, North Sumatra. Hatta said that incentives would be given to industries operating at designated economic zones, but cannot yet reveal what the incentives would be as they are still discussing with them. Hatta Radjasa added that a number of foreign investors had expressed interests in investing in the

palm oil downstream industry. These include potential investors from Japan. Palm oil is one of Indonesia's boom sectors. The country, with 7.9 million hectares of oil palm plantations, produces 19.2 million tons of palm oil per year, much of which is exported to many countries, generating total revenue of US\$12.4 billion in foreign exchange.

RI TO BE WORLD'S BIGGEST FISH PRODUCER IN 2015 : Indonesian Minister for Maritime and Fisheries, Fadel Muhammad stated that the country has a chance to be the world's largest fish producer in 2015 by cultivating superior fishes. Fadel Muhammad stated that Indonesia could be the biggest fish producer in the world, beating Peru and Chile. To achieve the goal, Indonesia have to cultivate Indonesia's superior fishes like tilapia fish, milkfish and freshwater cat fish, among others. Indonesia will also increase production of seaweed by 300 percent. Fadel added that the Banking sector should support fisheries business units to develop fish nursery, fish meal and researching institutions, among others. Fadel stated that he had explored the development of alternative fish meal in coordination with the Bogor Agriculture Institute in West Java province.

INDONESIA TARGETS BIGGER FISH CATCH IN 2010 : With this year's target unlikely to be met, the Indonesian government has set a less aggressive growth target of 6.9 percent for fish production in 2010 to reach 10.7 million tons.

Previous Maritime and Fishery Affairs Minister Freddy Numberi said earlier this year the ministry aimed to increase fishery production to 12.78 million tons, a significant jump from last year's 8.7 million tons. Data from the ministry shows however that production to only rise to 10 million tons. The ministry's secretary general Syamsul Maarif stated that while growth would be modest next year, the fisheries sector would still benefit from growing domestic consumption, and a planned financing scheme for industry players. Domestic fish consumption is forecast at around 30.47 kilograms per capita per year by the end of 2010. This year's domestic consumption has reached 30 kilograms per capita per year, up from last year's 28.57 kilograms per capita. Syamsul also said that the ministry was focusing on getting 20 percent of the budget allocated for the government's micro loan program (KUR) for the fisheries sector.

RI TO BUILD SOLAR CELL PLANT : As part of its efforts to generate electricity from renewable energy, the government will upgrade a solar cell power plant in Bandung to expand its capacity to 50 megawatts. Coordinating Economic Minister Hatta Radjasa said that the government had approved the plan and was now studying the best financing scheme for the project. The government stated that it would cost only about Rp 50 billion (US \$ 5.3 million). The project will be awarded to state-owned solar cell producer PT LEN Industri. Hatta said that the government expected the company to finance the project itself using internal funds or seeking other investment.

RI TO LIBERALIZE 8,000 COMMODITIES : The Indonesian government is likely to liberalize the import of around 8,000 commodities from other ASEAN members states in January 2010 as a follow up to the Free Trade Agreement (FTA). In total there will be around 8,000 types of commodities, this was stated by the Head of the Ministry's fiscal policy board, Anggito Abimanyu. Some of the commodities were currently subject to 5 percent and 2.5 percent duties. The new tariffs will only apply to imports from ASEAN members states, while duties on the import of commodities from China will be lowered to 3 percent. The Finance Ministry was in the process of drawing up a regulation on the tariff reduction. Hopefully, the regulation would be issued five days before January 1, 2010. On anti-dumping duties, the ministry had received a number of proposals from the Indonesian Anti-Dumping Committee

(KADI). The proposals were being discussed.

PURWAKARTA AND YOGYAKARTA AWARDED FAVORITE INVESTMENT REGION : Purwakarta regency in West Java province and Yogyakarta were awarded Indonesia's two best regions in attracting investment in 2009. Purwakarta regency beat five other nominees in the regency category, namely Sidoarjo in East Java (second), Sragen in Central Java (third), Jember in Bali, Kudus in Central Java and Bangka in Bangka Belitung. Yogyakarta, the tourist city, earn first place in the city category, followed by Cimahi, Bandung, Banjar (all in West Java), Denpasar (Bali), and Bitung in North Sulawesi. All awards were handed over at the 2009 Investment Award ceremony, by the Investment Coordinating Board (BKPM) in collaboration with Regional Autonomy Watch (KPPOD) and Bisnis Indonesia daily newspaper. The awards were based on the responses of 9,000 people surveyed on six criteria. These criteria included the availability of a local investment board; the quality of investment permit procedures, complaints mechanisms and service performance evaluation; the availability of investment information systems technology; innovation; and investment growth performance. According to the survey, Purwakarta had boosted its investment growth, mainly in manufacturing and agriculture industries. Up to 52 percent of the regency is dedicated to agricultural commodities including tea, natural rubber, cacao, coffee, coconuts and cloves. Purwakarta administration had also created four industrial zones, each of around 5,000 hectares. However, only around 30 percent of this land has been occupied by industries such as clothing, paper and ceramics manufacturers, and agriculture processing plants. Yogyakarta city was considered a business-friendly hub for investment in tourism. The exotic city with its unique arts and culture has become a paradise for tourism-related businesses such as restaurants, travel agents, transportation and communication. Domestic investment, meanwhile, grew 104 percent to around Rp 30 trillion (US \$3.18 billion). The government was targeting at least 15 percent growth in both foreign and domestic investment.

KEY POWER PROGRAM WILL BE READY BY 2010 : Up to half of the projects included in the first 10,000 megawatt (MW) power program will be ready by mid-2010. The government was upbeat about completing half of the power plants in

the 10,000 megawatt (MW) program by mid 2010, but construction delays have been encountered at a number of the plants in the program. Plants expected to be operational by mid 2010 include Indramayu (3x300 MW), Paiton (660 MW), Suralaya (625 MW) and the second unit in Rembang (315 mw), Electricity and Energy Utilization Director General J. Purwono stated. Financing for these plants has been secured and around half of the construction has been finished. The plants are expected to be complete sometime between June and December 2010.

RI'S COAL AND GAS POWER PLANTS MOST PROMISING FOR INVESTORS : A recent study of the European Union has highlighted Indonesia's nascent coal and gas power plant sector as among the most promising for investors from the continent. The study, revealed, stated that Indonesia with strong annual economic growth of more than 5 percent over the past several years, will continue to see increased demand for electricity. Julian Wilson, ambassador of the delegation of the European Commission to Indonesia and Brunei said that the study also recognized that the power generation sector in Indonesia is one of the most promising businesses where European enterprises have technological or design capacities complementary to Indonesian needs. EU welcomed the Indonesian government's program to shift a large part of its power generation from oil-burning plants to less market-sensitive sources such as coal and gas.

The government through state-owned electricity monopoly PT PLN, has decided to focus mostly on coal-fired power plants through its 10,00 megawatt (MW) power-generation scheme. At least 24 coal-fired power plants are scheduled for construction within the next few years. Europe is at the forefront of developing clean coal technologies that could find an application in Indonesia. PLN itself has appreciated it and qualified it as expensive but good. Therefore the European business community saw this sector as promising for the future. Unlike the price-competitive coal power plant business, the EU remains confident in the gas power plant sector. Indonesia's Energy and Mineral Resources Ministry said recently from that the government hoped to attract US \$21.68 billion in investment for gas projects between 2010 and 2014. Indonesian Investment Coordinating Board (BKPM) Chairman Gita Wirjawan has said that the country was eyeing 10 percent foreign direct investment growth in 2010, after experiencing a significantly drop this year due to the global economic turmoil.

RI TO HOST FAEA MEETING IN 2010 : Indonesia will host the 2010 ASEAN Economists Association Federation in 2010. The General Secretary of the Indonesian Economic Scholars Association (ISEI PP), Anggito Abimanyu said that the 2010 FAEA meeting will discuss the global economy in the 2010 Indonesian Economy Outlook seminar. The previous 2009 FAEA meeting was held in Cambodia, with ISEI participating. Besides to host the FAEA meeting, ISEI will also hold a plenum in Bandung, West Java, to discuss small and medium enterprises that have been playing an increasing role in the economy.

NSW SYSTEM TO BEGIN IN JANUARY 2010 : Indonesia is set to implement the National Single Window (NSW), a system for importers and exporters to receive trade permits, beginning January 2010. Indonesia will launch the system of a single window program for submission and application of documents related to export and import procedures on the third week

of January 2010. With the integration of all activities relating to exports and imports into the system, it would be easier for exporters and importers to obtain clearance from state agencies as the process come through only one gate, namely NSW portal. Later on, all export and import clearance no longer have to be processed from office to office, they only have to log on to the Website. Coordinating Minister for Economy Hatta Radjasa said that the online system for export documents and licenses would first be implemented at Tanjung Perak Harbour in Surabaya, East Java. Meanwhile, import documents and licenses can be processed, among other things, at Soekarno Hatta Airport and main seaports of Tanjung Mas in Semarang, Batam and Tanjung Priok. Going forward, other ports will come online. The NSW system is part of the ASEAN Single Window (ASW). By completing the online processing system and linking to the ASW, Indonesian firms will have a competitive edge over companies from countries without such system.

RI TO EXPORT GAS FROM NATUNA D-ALPHA : Indonesian Energy and Mineral Resources Minister Darwin Saleh stated that most of the gas produced from the Natuna D-Alpha Block in Riau will be exported. The block will begin to produce gas commercially in 2017. Located off Riau Islands, the Natuna D-Alpha block has around 222 trillion cubic feet (tcf) of gas reserves, of which about 46 tcf are thought to be commercially recoverable. Natuna D-Alpha is among the biggest reserves in Asia, and held more than a third of Indonesia's commercially recoverable reserves of 106 tcf, as of the end of 2007.

RI JEWELRY EXPORTS INCREASED : The Head of the

Indonesian National Agency for Export Development Esti Endah Krisnarini stated that jewelry export up to end of second quarter totaled US \$803 million, up one percent compared with that in the same period in 2008. Esti stated that the increase indicates good prospects for Indonesia jewelry products, considering almost all exports are declining amid the global crisis, mainly in countries of world export destination. Jewelry export destinations are Singapore, Australia, Hong Kong, United States, United Arab Emirates, several European countries and Japan. Buyers are interested in typically Indonesian designs and traditional uniqueness. Exhibition Committee Chairman of Mutu Manikam Indonesia Herawatie Wirayuda said that the government would continue to provide training for Indonesian craftsmen to improve the quality of Indonesia jewelry products. The government has conducted such training, led by a Belgian coach, in Bali and Yogyakarta.

RI TO BECOME SELF-SUFFICIENT IN SUGAR IN 2014

Indonesia has targeted 2014 as the year it becomes self-sufficient in sugar with total production of 4,900,000 tons a year. Though the six of sugarcane plantations dropped in 2009, it will go up again in 2010 because sugar price in 2009 was very good. Sugarcane plantations in 2009 occupied 430,000 ha of land. In 2010, the size will go up to 445,000 ha. But the total sugar plantations dropped because sugar price in 2009 was low, between Rp 4,500 and Rp 5,000 a kg. As the area of sugarcane plantations goes up in 2010, the government expects the country to be self-sufficient in sugar by 2014.

RI CONTINUES FOR RICE EXPORTS NEXT YEAR : The agriculture ministry has stated that next year Indonesia might still be able to export its special rice. Deputy Agriculture Minister Bayu Krisnamurthi said that the special rice includes black sticky rice and certified organic rice. Bayu Krisnamurthi stated that Indonesia has exported rice and next year will export more. In last August, Indonesia for the first time exported its certified organic rice from Tasikmalaya, West Java, to the United States, with a volume of 18 tons. While speaking of the impact of the climate change on rice supplies in Indonesia, Bayu added that with a production increase of 5.83 percent this year, rice supply would remain secured early next year. In the meantime, the world economy has been predicted to improve because the crisis is almost finished, and the prices of foodstuffs, including rice, may increase, also in Indonesia. In anticipation, the government is ready to provide the poor in the country with rice starting in January 2010, earlier than what the government had done in the past years.

NTB'S SEAWEED PRODUCTION REACHES 100,000 TONS

West Nusa Tenggara or NTB province produced a total of 100,000 tons of dried seaweed from January to November 2009. Head of the Provincial maritime and fisheries office, H.M. Ali Syahdan said that NTB can increase its dried seaweed production because out of its 23,000 hectares of potential seaweed production area, only 6,700 hectares have so far been developed. Syahdan added that NTB seaweed farmers became more motivated to produce seaweed after learning that the fisheries and marine commodity was exported to many countries. In fact, seaweed was now one of Indonesia's premier marine export commodities. Therefore, it was not surprising that national seaweed production increased from 32,000 tons in 2006 to over 36,000 tons in 2007 and to nearly 70,000 tons in 2008 and 100,000 tons in 2009. NTB's provincial government had launched a movement for coastal communities with a dried seaweed-based production target in the year 2013 totaling 546,626.40 tons of seaweed export standard quality. According to Syahdan, NTB has the potential to produce 800,000 tons of seaweed in a producing area of about 41,000 hectares.

Seaweed production in this area was expected to continue to rise to the maximum target of 800,000 tons, without mentioning the value of the exported seaweed. Syahdan said seaweed production centers were spread in the districts of East Lombok, Central Lombok, West Lombok, and other districts which have coastal area. The number of seaweed farmers in the province had reached 6,000.

RI TO IMPORT SUGAR : The Indonesian government is expected to import 500,000 tons of white crystal sugar from Thailand, China and India this month, State Enterprises (BUMN) Minister Mustafa Abubakar stated. Abubakar said that they hope that the sugar will be imported from Thailand and were also open to sugar imported from China and India. The minister added that for the importation and supply of the white crystal sugar the government had appointed state-owned plantation company PT Perkebunan Nusantara (PTPN), state-owned sugar distributor company PT Rajawali Nusantara Indonesia (RNI) and state-owned logistics firm Perum Bulog. The three state-owned companies have been appointed as registered importers. The sugar imports were now in progress so that there was no need to wait until 2010 to realize the import plan. The minister did not reveal the volume of the sugar that should be imported by each of the three companies that had been appointed by the government. Abubakar said earlier that sugar consumption in April 2010 would reach 1.2 million tons while stocks at home were only about 610,000 tons, leaving a deficit of 500,000 tons. Therefore, to cover the deficit, the government decided to import about 500,000 tons of sugar. In order to meet the national need for sugar, the government in the middle term was planning to increase the designed capacity of its domestic sugar production in 2025. For the need of industry, it will raise its production from the present 2.1 million tons to 3.3 million tons while for sugar consumption it will increase its production from the present 2.7 million to 5.6 million tons.

RI TO REMOVE TAXES IN RIAU TRADE ZONE : The Indonesian government announced plan to remove exit or entrance fee for commodities in Batam, Bintan, and Karimun Free Trade Zone as part of the plan to revise the trade regulation in the area. Coordinating Minister for the Economy Hatta Radjasa said that they will remove the (free trade) barrier in Batam especially the double taxation. The double taxation is fee paid as insurance for commodities entering or leaving the Batam, Bintan, and Karimun,, with the revision it will make the region a real Free Trade Zone. Earlier Trade Minister Mari Elka Pangestu said that the so called master list which requires importers to register all commodities entering the region, will also be revised. The new mechanism reportedly will allow importers to make changes on their import data at any time just by using packing list or commercial invoice.

RI HAS GEOTHERMAL RESOURCES UPTO 28,000 MEGAWATTS : Energy and Mineral Resources Minister Darwin Zahedy Saleh has recently stated that Indonesia was blessed with geothermal energy resources of up to

28,000 megawatts with a potential power generating capacity of 13,440 MW. Darwin also added that Indonesia have reserves reaching 14,473, which are scattered in 265 places across Indonesia. Only 4 percent of the existing geothermal potential or 1,189 MW was being used to generate electricity. The plant with the biggest designed capacity is located in West Java, namely 1,057 MW or 20 percent of the reserves, Central Java 60 MW, North Sulawesi 60 MW and North Sumatra 12 MW. In accordance with the law, the government had designated 22 geothermal work mining sites (WKP), eight in Sumatra, seven in Java, two in Sulawesi, three in Nusa Tenggara and the remaining two in Maluku.

Bali is expected to host the World Geothermal Congress on April 25-30,2010.

RI'S FIRST PRIVATE RAILWAY PROJECT READY FOR CONSTRUCTION

: A group of investors will soon begin building the first ever private railway in Indonesia worth US \$1 billion, as a key part of the planned development of a massive

US \$5 billion integrated industrial facility in East Kalimantan. The projects readiness was announced at a meeting between Indonesian President Susilo Bambang Yudhoyono and the crown prince and deputy ruler of the Emirate of Ras Al Khaimah, Sheikh Saud Bin Saqr Al Qasimi. MEC Coal and MEC Infra, two joint ventures of MEC holdings and Ras Al Khaimah Investment Authority, will develop a 130-kilometer railway line to facilitate the transport of raw materials and finished products in and out of East Kutai regency in East Kalimantan. Under the project agreement, MEC Infra will invest up to US \$1 billion in constructing the railway line linking the mine site at Muara Wahau to Bengalon on the coast. MEC's mine and railway are central to the development of a complex of integrated industrial facilities. These will include power plant fuelled by coal from MEC Coal, and aluminium smelter, a fertilizer plant and a high-capacity port terminal. All these would require total investment value of US \$5 billion. MEC Coal has a 12,000 hectare coal concession in East Kutai.

PERTAMINA'S KEROSENE-TO-LIQUIFIED-PETROLEUM-GAS (LPG) CONVERSION PROGRAM

: Indonesian State Oil and Gas company PT Pertamina stated that it had met the 2009 target for the government's kerosene-to-liquified-petroleum-gas (LPG) conversion program. Pertamina implements the program by distributing conversion packs, comprising a gas stove and a 3 kilogram canister targeting low income households. Pertamina's company's spokesperson Basuki Trikora Putra said that as of December 24, the 2009 target to distribute 23.7 million conversion packets have been fulfilled by Pertamina. Basuki added that Pertamina had also surpassed the 2009 target for the volume of distributed LPG and Kerosene substituted for. In 2009, Pertamina has distributed 1,743,922 metric tons of LPG, or 4 percent higher than the target for the year, and substituted for 5,214,709 kiloliters of kerosene, or 25 percent higher than the target. With the same level of progress, Pertamina said it was optimistic that it could finish the program in 2010 as scheduled. The government launched the program in 2007 in a bid to switch public consumption from kerosene to cheaper LPG. In the past, the kerosene, which is actually the raw material for aviation fuel, was used widely as cooking fuel across the country. Three years after the conversion program started, Pertamina stated that the province of Banten, Jakarta, West Java, Yogyakarta and South Sumatra had been converted and no longer needed kerosene for cooking purposes.

JASA MARGA TO HAVE CONSTRUCTION OF NEW HIGHWAY PROJECTS

: Indonesian State toll operator PT Jasa Marga plans to spend Rp 3.1 trillion (US \$328.6 million) in capital expenditure next year partly for the construction of new highway projects. Jasa Marga stated that the company would use the money for building three new toll road projects the Jakarta Outer Ring Road, the Kunciran-Serpong road in Greater Jakarta and the Gempol-Pasuruan road in East Java starting in the fourth quarter of 2010. included in Jasa Marga current toll road construction projects are the Cikampek-Jakarta route, the Bogor Ring Road in Greater Jakarta, the Semarang to Solo and Solo to Ungaran tollways in Central Java, and the Surabaya to Mojokerto tollways in East Java.

MALAYSIA BIGGEST EXPORTERS TO WEST SUMATRA : The import data showed that Malaysia was the biggest supplier of goods to West Sumatra in October 2009, contributing US \$806.2

thousand to the province's total imports. The Head of the local office of the Central Board of Statistics (BPS) Muchsin Ayub stated that the second biggest supplier is Thailand whose exports reached US \$558.0 thousand followed by Singapore US \$400.9 thousand. West Sumatra's imports of these countries included machinery/mechanical products, salt, rubber, rubber-based products, iron-based goods, steel, electric machine tools, sulphur, lime and other kinds of commodities.

S KOREAN INVESTORS BEGINS CORN PROCESSING PLANTS : A South Korean Investors has begun building two corn cultivation related plants one for corn germination and the other for corn processing in Puhuwatu district. Gorontalo Vice Governor Gusnar Ismail stated that the South Korean investor, PT HarimGroup was also planning to build six silos with a combined storage capacity of 6,000 tons to support its corn exporting activity. The company's corn germinating plant was being constructed in Patilinggio sub district to enable local corn farmers to have easier access to corn seeds. The building of the two plants was based on a Memorandum of Understanding (MoU) signed in the past by the Gorontalo provincial government and the South Korean government. The projects were scheduled to be completed by the end of 2009 and become operational at the beginning of 2010.

RI'S PERTAMINA EXCEEDS 2009 OIL, GAS PRODUCTION TARGET : Indonesian energy firm PT Pertamina EP's oil and gas production exceeded the target the government had set for 2009 at 125,500 barrels per day, the company's operations director, Bagus Sudaryanto stated. Sudaryanto added that Pertamina EP's average production between January and November 2009 reached 126,686 barrels per day, of about 1,186 barrels per day higher than the target. Pertamina is optimistic that at the end of the year they will exceed the target of 125,500 barrels per day. Bagus Sudaryanto said that the 126,686 barrels per day production showed an increase of 8.6 percent from that of the 2008 production which stood at 116,600 barrels per day.

PLN TO SPEED UP DEVELOPMENT OF POWER PLANTS : Indonesian state electricity company PLN Managing Director Dahlan Iskan stated the speeding up the development of power plants outside of Java. Dahlan stated they are designing projects of small power plants yet reaching the total capacity of 1500-2000 MW. Earlier, State-owned Enterprises (SOEs) Minister Mustafa Abubakar said that he had discussed with the Coordinating Minister for the Economy and the Ministry of Energy and Mineral Resources to prioritize fuel supply such as gas and coal for domestic needs.

PTPN XI SET TARGET OF SUGAR OUTPUT : Indonesian State-owned plantation firm PTPN XI has set itself the target of producing 450,000 tons of sugar in 2010. Adig Suwandi company's corporate secretary stated that PTPN XI was operating 16 sugar mills but this year it had failed to achieve its production target. Adig Suwandi said that the targeted production was expected to come from the milling of sugar cane which was expected to reach 5.78 million tons. The sugar cane would be obtained from a cultivated area of 70,460 hectares, consisting of 53,695 hectares belonging to small holders and 10,765 hectares owned by the company. This year, PTPN XI milled 5.31 million tons of sugar can harvested from an area of 69,692 hectares (49,317 were smallholders and 20,375 were company's own estate) with a sugar production of 364,510 tons. Suwandi stated that the realized production was still from the targeted 400,000 tons.

RMI EXPANDS ITS BUSINESS INTO THE TOBACCO INDUSTRY : Resources Jaya Teknik Management (RMI), active in capturing CO2 from industrial waste in the country, will expand its business into the tobacco industry, making it the first non-tobacco company in the world to enter the sector. RMI signed an agreement with Union Engineering of Denmark for the development of Dry Ice

Expanded Tobacco (DIET) plants in Indonesia. The deal was signed in Copenhagen, on the sidelines of the UN climate change conference. Under the agreement, Union Energy subsidiary Aircodiet will supply RMI with two DIET plants with a processing capacity of 600 kilograms of tobacco per hour. Total investment is pegged at US \$12 million. The two DIET plants will be built in Cilegon, Banten, near RMI's current CO2 capturing facility that processes the emissions from state-owned PT Krakatau Steel to extract the CO2 and sell it off. The new DIET plants will use CO2 captured from Krakatau Steel to process tobacco from farmers in Wonosobo, Central Java, with the end product to be sold to Sumatra Tobacco in Medan, North Sumatra. Of all major cigarette producers in Indonesia, only HM Sampoerna has its own DIET plants. The other import their DIET tobacco needs. RMI stated that it would be the world's first non-tobacco company to build a DIET plant.

HINO EXPANSION IN RI : PT Hino Motors Manufacturing Indonesia (HMMI), the local subsidiary of a Japanese commercial vehicle manufacturer, has completed the expansion of its factory in Purwakarta, West Java, through a US \$33 million investment. President of Hino Motors Ltd in Japan, Yoshio Shirai, said that the expected factory would have a production capacity of 35,000 units per annum up from an initial capacity of 10,000 units per year. This makes the plant the largest Hino Motors production factory outside of Japan. The expansion project was started in mid-2007 and finished in August this year. The expanded factory with a total area of over 53,000 square meters and total land of 120,000 square meters, is now producing light duty trucks for Hino and for Toyota Motors Corp., which owns a 50 percent share of the Japanese automotive manufacturer.

RI'S IT INDUSTRY RISING : The Indonesian industry has recently been listed in IT award ceremony. The awards were presented by Hitachi Industry, Hitachi Data Systems IT Inspiration Awards 2009 has five nominations. Indonesian industry was nominated in each nomination category.

Telkomsel, a telecommunication company, received an award for CIO (Chief Information Officer) of the year, credit to its Director of Planning & Development, Herfini Haryono. Since joining Telkomsel, Herfini Haryono has been instrumental in leading the IT team to carry out several projects. His leadership was recognized by Telkomsel by his appointment to be the first Director of Planning & Development in Telkomsel in year 2009. Along the line, the rival of Telkomsel, Indosat was nominated for Best Green Strategy for a Data Center for its project on how to realize power efficiency and storage technology refresh & virtualization. The third nomination was Most Innovative Use of Technology. For this nomination 3 Indonesian companies were included into this nomination. They were Direckorat Jenderal Pajak, PT Telkom and Telkomsel. Next, the nomination for Best Return-On-Assets Strategy. Bank Negara Indonesia was the nominee for its storage consolidation project. In the last category, Best Virtualization Strategy award, PT Telkom Tbk, PT Indosat Tbk, Direktorat Jenderal Pajak and Excelmindo Telecommunication earned this nomination.

LUXURY CAR MARKET ENJOYS BUMPER YEAR IN 2009 : The luxury car market, which has enjoyed trend-defying sales growth this year, may grow by 15 to 20 percent next year on back of stronger economic growth and higher purchasing power. Indonesian Automotive Industry Association (Gaikindo) Secretary-General Freddy Sutrisno stated that an expected 4,300 to 4,500 luxury cars would be sold in 2010, up from the expected 3,700 units in 2009. The range is in line with the 15 to 20 percent growth predicted for overall domestic car sales in 2010 to around 600,000 units.

YOGYAKARTA TO BECOME LEADING EDUCATION CENTER : The Yogyakarta Special Region of DIY will become the centre for education, culture and top tourist destination in Southeast Asia in

an advanced, independent, and prosperous society in 2025. In a bid to support the objective, when publicising the Regional Regulation (Perda) DIY No. 2 of 2009, the governor and the DIY provincial legislative assembly of DPRD had set regulations on the regional long-term development plan (RPJPD) in 2005 to 2025. The Regulation on DIY No. 2/2009 on the long term development plan (RPJPD) has a vision, mission, director, and priorities of development in 20 years. The regulations were also aimed at supporting the coordination among actors of development in achieving objectives, ensuring the integrity of creation, synchronization, and synergy both between regions, institutions and between central and local governments. In addition, it is also to ensure relevance and consistency between planning, budgeting, implementation, monitoring, and ensure the achievement of the use of resources in an efficient, effective and sustainable justice, and optimize public participation.

FOREIGN TOURIST ARRIVALS IN 2009 MAY EXCEED TARGET

: Director General of Tourism Marketing Sapta Nirwandar stated that total of foreign tourists visiting Indonesia in 2009 could exceed the target of 6.4 million people. The prediction was based on the total of foreign tourists arriving up to end October this year at 5.166 million or a 1.31% increase from 5,099,883 people during the same period in 2008. The total of foreign tourists to Indonesia in October 2009 stood at 547,159 people, a 3.36% increase from 529,391 people in October 2008. A significant increase of foreign tourists in the January-October period this year by 14.23%, which stands at 1,978,593 people, is through the Ngurah Rai International Airport in Bali. Tourists arriving through Polonia Airport, Medan, stood at 120,168 people, an increase by 17.16 percent. But foreign tourists coming through Soekarno-Hatta Airport marked a decline by 5.46 percent to 1,132,158 people in the January-October 2009 period, compared with the same period in 2008.

RI'S PREDICTS 2010 TOURIST ARRIVALS UP 8.5 PCT

: Indonesia aims to attract 7 million foreign tourists in 2010, up from about 6.45 million visitors this year. Indonesian Tourism and Culture Minister Jero Wacik stated that foreign tourists in 2010 were expected to spend around US \$1,000 each, meaning a US \$7 billion inflow into the economy. Tourism accounts for about 3 percent of gross domestic product in Southeast Asia's biggest economy, but some areas, including the resort island of Bali, are heavily dependent on tourism for jobs and growth. The archipelago of more than 17,500 islands has beaches, mountains and dive-spots among its diverse attractions, but tourism infrastructure outside Bali is often poor and tourism campaigns have often been criticised as lacklustre. Indonesia is also well behind tiny neighbour Singapore, which aims to attract up to 9.5 million tourists this year, and Malaysia, which is targeting 19 million foreign tourist arrivals.

RUSSIAN TO BUILD TOURIST RESORT IN INDONESIA

: Russian investors were ready to develop a tourist resort in Bintan, Riau islands Province. Russian investors plan to build a tourist resort at a 55-hectare coastal area at Berakit village, Bintan District. The construction work is expected to start late December 2009 or early January 2010.

DUTCH TOURIST ARRIVALS IN BALI INCREASE

: The number of Dutch tourists visiting Bali in the first ten months of 2009 rose 22.01 percent to 63,622 from the same period last year. The figure put Dutch in the tenth place as the resort islands source of foreign tourists, overtaking the US. It was only in the past three months that the European country overtook the US. The Dutch tourists accounted for 3.21 percent of 1,982,274 foreign tourists visiting Bali in the January-October 2009 period. Compared to the same period last year, the number of tourist arrivals in Bali in the year ended October 2009 rose 14.22 percent. The vast majority of the Dutch tourists visited Bali via Ngurah Rai Airport. Only eight of them came to the resort island by cruise liner. Head of the Bali provincial Statistics Office Ida Komang Wisnu said that six of the ten biggest sources of foreign tourists contributed significantly to the total number of tourists visiting Bali over the period. The number of tourists from China rose

65.29 percent, France 51.07 percent, Australia 35.46 percent, Dutch 22.91 percent, Britain 12.36 percent, and Malaysia 9.14 percent. Meanwhile, the number of tourists from Japan fell 9.12 percent, South Korea 6.11 percent, Taiwan 9.25 percent and Germany 7.20 percent.

TOURIST ARRIVALS IN BALI INCREASES

: The number of tourist arrivals in Bali is likely to hit a record high of 2.1 million in 2009, well above the target of 1.8 million for the year. The Head of Bali Tourism office Ida Bagus Subhiksu stated that the number of tourist arrivals in the January-October 2009 period already reached 1.9 million, the figure is predicted will increase to 2.1 million by the end of this year. It was very likely the figure could be achieved as the number of tourists visiting Bali showed an upward trend. The other indicator was the occupancy rate of the province's hotels which reached an average of 85 percent. Bali is favorite destination for Australian and Japanese tourists. Ida Bagus predicted Australia and Japan would remain Bali main sources of foreign tourists next year.

RI PROPOSES 3 BALI WORLD HERITAGE SITES

: Indonesia has proposed three natural and historical locations in Bali as possible world heritage sites in the upcoming 2010 selection process by the United Nations Educational Scientific and Cultural Organization (Unesco). Director General for History and Archaeology Hari Untoro Drajat stated that the government is now preparing all the requirements needed to possibly make one of the locations as a Unesco world heritage site. The three included the Pakerisan Riverbed in Gianyar, traditional rice fields Jatilwuh and Taman Ayun Temple in Mengwi, Badung regency. Drajat stated that the three sites have strategic value to safeguard Bali's culture, traditions and environment. The 45.22 kilometer Pakerisan River irrigates 30 surrounding villages in Gianyar regency. The villages on each side of the river were among the earliest settlements in Bali. There are 30 historical sites along the Pakerisan Riverbed including the Tampak Siring water palace, the Tirta Empul temple, the Gunung Kawi temple and Goa Gajah built between the 8th and 11 centuries. The Taman Ayun Temple is one of the relics from the Mengwi Kingdom, a historical royal dynasty in Bali, while the Jatilwuh rice fields reflects Balinese agricultural society. The three clearly portray the lives of the Balinese people and their tradition and culture during the Tri Hita Karana era, which focused on harmonious relations between nature, the people and the Creator. Drajat stated that the three sites covered by one nomination number (C.1194) and do expect Indonesia to have three more world heritage sites, which can promote Bali in particular and Indonesia in general and globally. Currently, Indonesia has three designated world heritage sites at Borobudur Temple, Prambanan Temple and at the Sangiran archaeological sites, all in Central Java. The Indonesian government has also previously proposed Tana Toraja in South Sulawesi as a Unesco world heritage site.

BATAM TO DRAW 500,000 MALYASIAN TOURISTS IN 2010

: Batam island expects to attract at least 500,000 tourists from Malaysia during Visit Batam Year 2010. Its director of the tourism and culture department, Guntur Sakti, said that the target was achievable because in recent years Malaysian tourists were the third highest to visit Batam, about 45 minutes by ferry from Johor Baharu. This year upto October, Batam recorded more than 900,000 tourists out of a target of one million domestic and foreign tourists, of which 30 percent were from Malaysia. The Nusantara Parade, which portrays the culture of all the provinces of Indonesia, is expected to be a major tourist draw next year. Also on the 2010 calendar is the "Kenduri Seni Melayu" (Feast of Malay Culture) which will feature various aspects of Malay culture, such as dances and songs from several provinces, including Riau, Lampung, Jambi, Aceh, Western Sumatra and also neighbouring countries such as Malaysia and Singapore. Guntur stated that Batam was ready to accommodate the anticipated tourists with more than 6,000 hotel rooms as well as homestays. Batam, which is better known as an integrated industrial site in Indonesia, is now popularly known as Bareleng an acronym of the names of the three islands of Batam, Rempang and Galang out of the seven islands connected by six bridges.

Indonesia Newsletter (December 2009)

EXHIBITION CALENDAR 2010 ORGANIZED BY PT. PAMERINDO BUANA ABADI Visit : www.pamerindo.com

11-13 March 2010 - Bali International Convention Centre, Nusa Dua, Bali

Food, Hotel & Tourism Bali 2010 : The 7th International Exhibition for Equipment, Food, Beverages and Services to Support Indonesia's Tourism and Hospitality Industries.

Retail Indonesia 2010 : The 8th International Retail Technology, Equipment, Display and Storage Exhibition.

2-5 June 2010 - Grand City Convention & Exhibition Centre, Surabaya

Manufacturing Indonesia - Surabaya 2010 : The 6th International Machine Tool, Metalworking, Welding, Manufacturing Machinery and Equipment Exhibition.

Machine Tool Surabaya 2010 : The International Machine Tool, Metalworking and Allied Industries Exhibition.

Welding Surabaya 2010 : The international Welding and Metal Fabrication Exhibition

Packaging, Plastics, Mould & Die Machinery Surabaya 2010 : The International Packaging, Plastics and Rubber, Mould and Die Exhibition

Textile Machinery Surabaya 2010 : The International Textile Machinery, Garment Making and Finishing Equipment Exhibition

Marine & Shipbuilding Surabaya 2010 : The International Marine, Shipping, Port Equipment and Cargo Handling Exhibition

Electric, Power, Oil & Gas Surabaya 2010 : The International Electrical Equipment, Power Generation, Oil and Gas Exhibition

Industrial Automation & Logistics Surabaya 2010 : The International Automation Technology and Materials Handling Exhibition

Vehicle Manufacturing & Automotive Technology Surabaya 2010 : The International Vehicle Manufacturing Machinery, Components, Spares, Maintenance and Forecourt Equipment Exhibition

29 September - 2 October 2010 - Jakarta International Expo, Kemayoran

Energy & Infrastructure Indonesia 2010 Series : The International Exhibition for the Development of Indonesia's Infrastructure Including : Sustainable Energy & Mining, Water + Sanitation, Road, Railways, Bridges, Ports and Airports, Construction, ICT, Emergency Management Technology.

1-4 December 2010 - Jakarta International Expo, Kemayoran

Manufacturing Indonesia 2010 : The 24th International Machine Tool, Metalworking, Equipment, Materials and Services Exhibitions including : .

Machine Tool Indonesia 2010 : The 24th International Machine Tool, Metalworking and Allied Industries Exhibition incorporating Welding Indonesia.

Human Resource & Vocational Training Indonesia 2010 : The International Human Resource and Training Exhibition

Industrial Automation & Logistics Indonesia 2010 : The 13th International Automation Technology and Materials Handling Exhibition.

Vehicle Manufacturing & Automotive Technology Indonesia 2010 : The 10th International Vehicle Manufacturing Machinery, Components, Spares, Maintenance and Forecourt Equipment Exhibition.

CIL Indonesia 2010 : The 14th International Exhibition of Chemical & Process Engineering, Instrumentation and Laboratory Equipment.

Water & Envirotech Indonesia 2010 : The 17th International Water and Environment Technology Exhibition

Plastic & Rubber Indonesia 2010 : The 23rd International Plastics and Rubber Machinery, Processing and Materials Exhibition, Incorporating : Mould & Die Indonesia.

Propak Indonesia 2010 : The 23rd International Series of Exhibitions for the Processing & Packaging Industries Incorporating : Printing Indonesia 2009..
